

EX100

100m HDMI Extender Set

Features

Supporting 1080p Video and Dolby Digital Audio PLUS IR extension for remote controls up to 100m with a single CAT6 cable, this HDMI Extender represents outstanding value for money!

Comprising of a Sender Module (with an included 5v power supply) which sends the HDMI data over 1 x RJ45 cable, and a Receiver Module, you simply need one CAT6 cable of your desired length to extend your signal. Each Sender/Receiver unit has a Female HDMI Socket, making them compatible with any of our HDMI Cable range.

So whether you're trying to run HDMI signals to another room in your house, or just to a Projector or TV far away, finally a cost effective solution is at hand! Packaged in a tidy retail box with included power supply, Sender/Receiver, IR cables and Instruction Manual, this HDMI Over CAT6 Balun is compatible with any HDMI enabled device*.
