

SW118A DSP - SW118

18" Active DSP Subbas Speakers
18" Passive Subbas Speakers

Features

SW 118ADSP is the active version of SW 118. Thanks to the highly powerful multi-channels D class switching power amplifier module (1 X 2600W@4Ω). The amplifier module is developed by exceptional analog circuit technology which is without unwanted DSP treatment. It delivers widely open and crystal clear sound. The built-in analog crossover and limiter make the system well-protected and truly plug and play.

Technical Specifications

Frequency Response	35Hz - 200Hz (-10dB)
Power Amp Rating	1300W-2600W
LF Driver	1x18"
Maximum SPL	139dB
Weight	62kg
Connection	XLR+POWERCON+SPEAKON
Enclosure	18mm multilayer plywood
Rigging	Four fly points + pole mounts
Finish	Black water-based paint
Grille	Black steel mesh + acoustic-transparent cloth
