

# CLM12DSP

## PORTABLE LINEARRAY SPEAKER

### Features

The LUCASACS CLM12DSP is a portable all-in-one PA speaker system that you can easily carry from gig to gig. With a customized 12" powered subwoofer and eight 3" full-range drivers inside two column speakers, it delivers rich bass and crisp highs. All drivers are positioned at precise angles and the speaker provides great sound coverage. Even better, the 12" subwoofer module is powered by a Class-D amplifier providing you with both massive power and efficiency. There is also one height spacer included that allows you to adjust the height of the array speakers. It is a professional-quality portable PA system for a great-sounding show.

The CLM12DSP has a built-in 2-channel mixer and comes with two 1/4" and XLR inputs (MIC/Line switchable) and one XLR output, enabling you to connect your guitar and portable media player directly. Built-in MP3 module is also featured to support USB/SD inputs. The speaker is equipped with Bluetooth 5.0 and so you can stream music from your Bluetooth-enabled devices. The True Wireless Stereo (TWS) function allows you to pair two CLM12DSP speakers at the same time for even more powerful real stereo sound.

The LUCASACS CLM12DSP is compact and light enough to carry around and can be set up in seconds. With a carry bag for the spacers and column speaker, the whole PA system can be easily transported from gig to gig. It is ideal for live performances, speeches, movie nights and venues such as homes, coffee houses, auditoriums, churches and more.
