

INSDT100

IP NETWORK SYSTEM SERVER

Features

LUCASACS INSDT100 series INS series is the central unit of IP systems, adopts IP Broadcast Intercom Server industrial host. The system is stable and reliable with SSD and aluminum alloy panel. It can work 24 hours a day, and can work stably in low and high temperature for a long time. With Ethernet hardware, no additional line maintenance is required for the whole system. It has high performance, low power consumption and can work stably for a long time. With professional server software, it can configure, manage and maintain all terminal devices. The server is divided into two forms, 7U and 2U, to meet different requirements.
